ELSEVIER

Computers and Geotechnics 25 (1999) III–IV

COMPUTERS AND GEOTECHNICS

www.elsevier.com/locate/compgeo

Contents of Volume 25

Number 1

1 Identification of parameters for air permeability of shotcrete tunnel lining using a genetic algorithm
A.A. JAVADI, R. FARMANI, V.V. TOROPOV, C.P.M. SNEE (UK)

25 Effect of variable location of soil layers on the behaviour of laterally loaded piles — sensitivity analysis
B.B. BUDKOWSKA (Canada)

Technical Note

45 Displacement charts for slopes subjected to seismic loads
L. YOU, R.L. MICHALOWSKI (USA)

I Calendar of Events

Number 2

57 Analytical solution for pile hammer impact
W.A. TAKE (UK), A.J. VALSANGKAR (Canada), M.F. RANDOLPH (Australia)

75 Computation of point load solutions for geo-materials exhibiting elastic non-homogeneity with depth
Z.Q. YUE, J.-H. YIN, S.-Y. ZHANG (Hong Kong)

107 Computational stochastic analysis of earth structure settlements
A. MARINILLI, M. CERROLAZA (Venezuela)

I Calendar of Events

Number 3

123 A knowledge-based system for correlations using object hierarchies
A. GIOLAS, D.G. TOLL (UK)

141 Three-dimensional finite element studies of the moment-carrying capacity of short pier foundations in cohesionless soil
M. LAMAN (Turkey), G.J.W. KING, E.A. DICKIN (UK)

0266-352X/99/$ - see front matter © 1999 Elsevier Science Ltd. All rights reserved.

157 Two theoretically consistent methods for analysing triaxial tests
U. PRAASTRUP, K.P. JAKOBSEN, L.B. IBSEN (Denmark)

171 Analysis of the remediation of a contaminated aquifer by a multi-well system
J.C. WANG, J.R. BOOKER, J.P. CARTER (Australia)

I Calendar of Events

Number 4

191 Ground movement analysis of soil nailing construction by three-dimensional (3-D) finite element modeling (FEM)
M. ZHANG, E. SONG, Z. CHEN (China)

205 Fuzzy-random probabilistic analysis of rock mass responses to explosive loads
C. WU, H. HAO, Y. ZHOU (Singapore)

227 Parallel simulations of pore-scale flow through porous media
J.P. MORRIS, Y. ZHU, P.J. FOX (USA)

247 A constitutive model for rock accounting for viscosity and yield stress degradation
P.A. NAWROCKI (Canada), Z. MRÓZ (Poland)

Technical Note

281 Parallel processing for a discrete element program
C.H. DOWDING, O. DMYTRYSHYN, T.B. BELYTSCHKO (USA)

I Calendar of Events
